(54) PARTS DATA CONTROL METHOD CAD SYSTEM FOR BUILDING

(57)Abstract:

PURPOSE: To provide a parts data control method for a CAD system for a building, which is capable of reducing the number of codes expressing parts data and easily dealing with the usage of a new design element.

CONSTITUTION: Parts data of expressing the design element is expressed by a basic code 21 for expressing the basic shape of the design element and a development code 31 for expressing change contents of the basic shape. Thereby, the number of codes can be reduced compared with the case of setting a code every design element and its variation, so that control is facilitated and data capacity is reduced. Besides, the new design element can also easily be dealt with by the new combination of the basic code 21 and the development code 31.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
